9.00am : Introduction to Energy Management

This practical and interactive workshop will give you a strong foundation in the basics of energy management. Learn how to understand your business's energy use. Leave armed with an energy action plan for your business to take-action and reduce costs. After the course, you'll be eligible to apply for one-on-one coaching to kickstart your energy savings projects.

Hosted by the NSW Office of Environment and Heritage (OEH)

\$100 (\$75 early bird rate until 5th March)

1.15pm : Battery Energy Storage Solutions for Business and Industry

This workshop will outline battery storage systems for commercial and industrial applications. Three sessions and a roundtable discussion will provide detailed overviews for CEO's, Directors and Managers considering acquiring or expanding the battery storage resources of their companies or organisations.

Hosted by the Australian Energy Storage Alliance (AESA)

Free but registrations are essential
