

Larry Botham

Director

Larry Botham is the founder of Bioaction Pty Ltd and is the CEO and technical executive of the company. He has spent the last 20 years in the environmental industry with particular focus on the application of minerals and organic media for the treatment environmental depleting contaminants (liquid and gas).

Bioaction is an industry leader supplying the major water authorities and regional councils, major civil contractors and the industrial markets nationally.

In the recent years there has been a focus on the research surrounding bio-filtration to mitigate odorous, corrosive and hazardous emissions, treating contaminated water and wastewater. As part of the research and product development Larry has been engaged with research partners at Newcastle University, and Western Sydney University.
